

MC 2000 UNIVERSAL BENDING MACHINE

Opening degree of the arms depending on the profile section, possibility of both vertical and horizontal bending. Equipped with program PROTHEO 16-32, able to calculate curves of up to 9 radius and 9 angles, winder, automatic curve correction, memory to save the curves already made. Optional: radius meter to calculate the radius of the curve under production and automatic correction before the end of the bending process.

MC 3 X 3

Having the same technical feature as the MC 2000, central axis - electronically controlled, vertical-horizontal variation of the working plan - electronically controlled. Machine manufactured on a ore robust bas for the bending of bigger section profiles.

MC 5 X 3

Same features as the MC 3x3. Overdimensioned for the bending of profiles of bigger section.

MC 92 FIX RADIUS BENDING MACHINE

Single axis bending machine, electronic degree positioning enabling curves of very small radius.

AUTOMATIC STORAGE SYSTEMS

Manufacturing of automatic storage systems for either profiles or parts. Both standard and customized manufacturing according to customer's requirements. Personalised projects. FEEL FREE TO consult our technical department, no commitment implied.
